

Frannie's Food Emporium

Frannie's Food Emporium sells both taxable and nontaxable items. They use the z-tape from their register (which details the day's sales and payment totals) to enter receipts using a sales receipt in QuickBooks Online. They hold their cash and checks together to make a deposit once a week.

Their Mastercard and Visa payments are reported together on the z-tape, but activity needs to be grouped together into one deposit in QuickBooks. Amex payments that are deposited to their bank each day are not grouped with other days' payments.

Using the information from the z-tape and the above information. Determine the correct product/service setup required to correctly record this workflow for each item listed below:

Sales	Amount
Retail Sales—Taxable	2376.90
Retail Sales—Nontaxable	439.22
Sales Tax	222.24
Total Sales	3038.36
Cash	548.25
Check	1256.30
MC/Visa	953.22
Amex	280.59
